

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-6. (canceled)

7. (currently amended) A method of providing electronic mail notification to a calling communications device, comprising:

formulating a user specific retrieval profile designating user specified pre-designated information for said calling communications device;

receiving a call together with call related information from a calling communications device calling a first phone number;

terminating said call from said calling communication device before answering;

associating an email comprising a second phone number associated with said call related information of said calling communications device, said second phone number being a different phone number than that specified by said call related information;

in response to detecting said call related information, ~~automatically fetching and transmitting~~ triggering transmission of said email comprising said second phone number to said calling communications device according to said user specific retrieval profile; and

in response to a second call to said second phone number, transmitting said user specified pre-designated information to said calling communication device.

8. (previously presented) The method of providing electronic mail notification to a calling communications device according to claim 7, further comprising:

obtaining a communications device identifier when said calling communications device dials said first phone number; and

using said communications device identifier to select an electronic mail message.

9-25. (canceled)

26. (previously presented) A method of retrieving information by a first calling device from a second device, comprising:

formulating and storing a user specific retrieval profile designating user specified pre-designated information relating to a calling communication device;

receiving a call together with call related information from a calling communications device calling a first phone number;

terminating said call from said calling communication device before answering;

associating a data message with said call related information of said calling communication device, said data message comprising a second phone number than that specified by said call related information;

in response to detecting said call related information, triggering transmission of said data message comprising said second phone number to said first calling device according to said user specific retrieval profile; and

in response to a second call to said second phone number, transmitting said user specified pre-designated information to said calling communication device.

27. (previously presented) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

converting said retrieved user specified pre-designated information to a short message and transmitting said short message to said calling communication device.

28. (previously presented) The method of retrieving information by a first device from a second device according to claim 26, further comprising:

determining said first telephone number from said call related information associated with said call to a second telephone number by said calling communication device.

29. (canceled)

30. (previously presented) A system for retrieving information by a first device from a second device, comprising:

means for formulating and storing a user specific retrieval profile designating user specified pre-designated information relating to a first calling communication device;

means for receiving a call together with call related information from a calling communications device calling a first phone number;

means for terminating said call from said calling communication device before answering;

means for associating a data message with said call related information of said calling communication device, said data message comprising a second phone number than that specified by said call related information;

means for triggering transmission of said data message comprising said second phone number to said first calling device according to said user specific retrieval profile, in response to detecting said call related information; and

means for transmitting said user specified pre-designated information to said calling communication device in response to a second call to said second phone number.

31. (previously presented) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for converting said retrieved user specified pre-designated information to a short message and transmitting said short message to said calling communication device.

32. (previously presented) The system for retrieving information by a first device from a second device according to claim 30, further comprising:

means for determining said first telephone number from said call related information associated with said call to a second telephone number by said calling communication device.

33. (canceled)
